ENGINEERING CONSULTANTS

INVESTOR IN PEOPLE

Transportation, Road Safety, Highways & Drainage

Sustainable Engineering for a Better Future

A “one-stop” service for Developers, Architects, Planning, including innovative designs, sympathetic to the environment, our practice provides a broad range of consultancy services to support sustainable development for new-build, refurbishment and regeneration.

Our input is over the three key stages of any project:

- Feasibility Stage
- Detailed Design Stage
- Procurement Stage

(All designs and drawings can form the basis of a Section 278/38 Agreement.)

Sustainable Energy Services

CO2 & Energy Reduction Strategies

Our team of power industry and environmental specialists has many years of experience of renewable and “green” energy projects throughout the UK.

CO2 Reduction Assessments
Ecohomes Assessments

Key Support Services

Supporting Sustainable Developments

The practice is committed to providing a first class professional service regardless of size or complexity of project.

Essential support services include:
Expert Witness
Public Consultation and Exhibitions
Noise Assessments
CDM Coordinator

Local Authority Services

Engineering Consultants to Local Authorities

The Partnership offers a range of specialist services to Local Authorities. These include Road Safety, Parking, Traffic Management, Highway Maintenance Strategy and other innovative design and engineering solutions.

Our expertise lies in the following areas:
Road Safety Engineering
